DETAILED ACTION

The 37 C.F.R. 1.131 Declaration has overcome the Goetz et al. reference and the non-final rejection of previous office action is withdrawn. Claims 9-13, 15-17, 25-29, and 31-33 are allowed.

EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Rachel Leiterman on 2/15/05.

The application has been amended as follows:

In the claims

Cancel claims 18-24.

Allowable Subject Matter

The following is an examiner's statement of reasons for allowance:

The claimed invention is a method of forming a light-emitting device, the method comprising:

- Forming a first semiconductor layer of a first conductivity type and having a first surface;
- Forming an active region over the first semiconductor layer, the active region including at least two quantum well layers separated by a barrier layer, where the quantum well layer and the barrier layer is graded layer formed from a III-Nitride semiconductor alloy $\text{In}_x\text{Al}_y\text{Ga}_{1-x-y}\text{N}$ where $0 \leq x \leq 1$, $0 \leq y \leq 1$, $x+y \leq 1$, the graded layer having a composition graded in a direction substantially perpendicular to the first surface of the first semiconductor layer;
- Forming a third semiconductor layer of a second conductivity type over the active region.

The prior art of record does not disclose or suggest either in singly or in combination the following limitations and other elements in the claims:

- Reference Jewell et al. (US 5,960,018) do not disclose a III-Nitride semiconductor alloy $\text{In}_x\text{Al}_y\text{Ga}_{1-x-y}\text{N}$ where $0 \leq x \leq 1$, $0 \leq y \leq 1$, $x+y \leq 1$.
- Reference Tadatomo et al. (US 5,810,925) do not disclose the quantum well layer and the barrier layer is graded composition in a direction substantially perpendicular to the first surface of the first semiconductor layer.

Therefore, the above references do not disclose the claimed invention of present application and claims 9-13, 15-17, 25-29, and 31-33 are allowed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue

fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
